

# Flash Music Player for Free by Filmtv-tracks.com

We are happy to offer our Flash music player for websites

Try it out – it's free!

<http://www.filmtv-tracks.com/>

## Installation guide

1-Place all files in the root folder of your website:

This is for the light (silver) skin, do the same for the black skin

Content,

light-xml\_mp3\_player.swf

light-xml\_mp3\_player\_light fla

xml\_mp3\_player.swf

mp3\_player.html

and folder light-content that contains the cover albums + mp3 songs

2- Paste the following code into your HTML page to embed the Flash object.

```
<object classid="clsid:d27cdb6e-ae6d-11cf-96b8-444553540000"
codebase="http://fpdownload.macromedia.com/pub/shockwave/cabs/flash/swflas
h.cab#version=8,0,0,0" width="280" height="280" align="middle">
<param name="allowScriptAccess" value="sameDomain" />
<param name="movie" value="light-xml_mp3_player.swf" />
<param name="quality" value="high" />
<param name="bgcolor" value="#000000" />
<param name="FlashVars" value="toLoad=light-content.xml" />
<embed src="light-xml_mp3_player.swf" FlashVars="toLoad=light-content.xml"
quality="high" bgcolor="#000000" width="280" height="280" align="middle"
allowScriptAccess="sameDomain" type="application/x-shockwave-flash"
pluginspage="http://www.macromedia.com/go/getflashplayer" />
</object>
```

3-Save your html page and upload it to your website

4-The Mp3 path can be changed in the content file, we suggest that you use a text file or note pad. In this content file, you will be able to insert the mp3 path, the folder where the mp3s are placed, the title for each track and the cover album (jpg).

This is a free offer, no support is given. Thank you for your understanding.

Now you are set

Enjoy  
Thea team

The image shows a screenshot of a music player interface. At the top left is a square album art placeholder with a blue and white abstract design. To its right, the current track is identified as "Dan Foster - Air Force Mission - short mix" with a progress bar and a time of 00:02. Below this are standard playback controls: a left arrow, a pause button, a right arrow, a volume icon, and a volume slider. A playlist titled "Title" is displayed below the controls, listing five tracks by Dan Foster. The first track, "Dan Foster - Air Force Mission - short mix", is highlighted with a light blue background. At the bottom of the interface, the text "Music player by Filmtvtracks" is visible.

oster - Air Force Mission - shc  
00:02

◀ || ▶ 🔊

**Title**

- ▶ Dan Foster - Air Force Mission - short mix
- ▶ Dan Foster - American SPY
- ▶ Dan Foster - Battle PLAN 1
- ▶ Dan Foster - cYBER TIMES
- ▶ Dan Foster - FROM FAR AWAY

## FEATURES

- XML Driven Playlist
- Dynamic path to XML in HTML
- Unlimited tracks
- Album art thumbnail image (any size supported)
- Supports audio streaming
- Colours can be changed via XML
- Generated Scrolling Song List
- Track time display
- Dragable Volume Bar
- Graphic EQ Animation

## INSTALLING IN HTML

Paste the following code into your HTML page to embed the Flash object.

Please note FlashVars variable in object and embed tags needs to direct to the path of the XML.

```
<object classid="clsid:d27cdb6e-ae6d-11cf-96b8-444553540000"
codebase="http://fpdownload.macromedia.com/pub/shockwave/cabs/flash/swflas
h.cab#version=8,0,0,0" width="280" height="280" id="xml_mp3_player"
align="middle">
<param name="allowScriptAccess" value="sameDomain" />
<param name="movie" value="xml_mp3_player.swf" />
<param name="quality" value="high" />
<param name="bgcolor" value="#000000" />
<param name="FlashVars" value="toLoad=content.xml" />
<embed src="xml_mp3_player.swf" FlashVars="toLoad=content.xml"
quality="high" bgcolor="#000000" width="280" height="280"
name="xml_mp3_player" align="middle" allowScriptAccess="sameDomain"
type="application/x-shockwave-flash"
pluginspage="http://www.macromedia.com/go/getflashplayer" />
</object>
```

## EDITING XML

To use this component you need to first add your MP3 tracks to the “content” folder. Then you need to edit content.xml to add paths to each MP3 and set the track name. Below is the XML structure:

```
<content
HighlightColour="#0099FF"
ScreenColour="#EAECD8"
ScrollTextColour="#282820"
TimeTextColour="#333333"
EQColour="#333333"
ProgressBarColour="#8C8C80"
MenuBg1Colour="#FFFFFF"
MenuBg2Colour="#E7EDFE"
MenuTextColour="#333333"
MenuTextColourSelect="#FFFFFF"
DefaultVolume="80">
  <mp3 Thumb="content/thumb1.jpg" Title="Digital Science - Very long song
name to show scrolling" Path="content/track1.mp3"/>
```

To add a thumbnail image see Thumb attribute. To set the title of the track see attribute Title. The Path attribute is to set the MP3 path.

## EDITING THE FLA

To change the design or settings of the audio player, open `xml_mp3_player.fla`  
Inside movieclip symbol "content\_mc" in the Actions layer you will find the  
ActionScript.
